

COOPERATION REFERENCE OF GEM SYSTEM WITH MEDICALC SOFTWARE

For the Operation and Support of Oracle Database for Healthcare Facilities

Our IT Solutions Will Impress You!

Implementation Date: long-term cooperation

Cooperation with Medicalc software, an innovator in the field of hospital information systems, in which GEM System is involved in the delivery of solutions for healthcare facilities.

Subject of Realization

- ✓ Oracle Database, especially ensuring their operation in 24/7 mode and complete database management including migrations to new versions.
- ✓ This is a critical solution for clients as part of key services for the operation of hospitals and clinics, e.g. In order to support the operation rooms.
- ✓ At the same time, 24/7 support is provided by experienced experts within the GEM System, whereby the first contact is already provided by IT professionals.
- ✓ Real-time monitoring checks parameters databases and allows predicting possible future outages.
- ✓ Another part of the work is the supply of expert consultancy services in the area of Oracle Database for the Medicalc software company.

It involves clients:

- REGIONAL HOSPITALS
- DISTRICT HOSPITALS
- OTHER CLINICS

Oracle Database and the Reasons for Oracle:

- ✓ GEM System is a major partner of Oracle – OPN Member with Cloud Sell Track expertise.
- ✓ Oracle Database is a multi-platform database system with advanced data processing capabilities, high performance and easy scalability.
- ✓ Oracle was the clear choice of clients in the healthcare due to its robustness, flexibility database and a wide range of management options of large-scale data objects.
